

ALLEGATO 1

Scheda caratteristiche tecniche piezometro

Cantiere : Cava Faraona, Holcim Ternate/Comabbio		Rif. N. : M75_09 rev 0
Committente : Holcim Italia S.p.A.		Coordinate Piezometro: X: 1475104 Y: 5071397
ID Piezometro : Pz1	Ubicazione : Via Verga	
Rete di monitoraggio : SI		

Dati piezometro/pozzo:

Profondità (m) : 33		Contaminazione rilevata : NO		
Quota ass. (m.s.l.m.) : 283,96	Soggiacenza (m) :		Profondità Filtri : DA:	A:
Diametro piezometro (") : 3	PVC	Chiusino	10	33 m
Anno di realizzazione : 2013	☒	☐		m
Acquiferi captati :				m

Note : Profondità water level logger 24,10 m da pvc

Dati storici della soggiacenza (m s.l.m.)

Data	Livello piezometrico (m S.l.m.)	Soggiacenza (m)
ottobre 2013	270,02	13,94
novembre 2013	269,81	14,15
dicembre 2013	269,53	14,43
gennaio 2014	270,46	13,5
febbraio 2014	271,78	12,18
marzo 2014	273,01	10,95
aprile 2014	273,12	10,84
maggio 2014	273,02	10,94
giugno 2014	272,73	11,23
luglio 2014	272,54	11,42
luglio 2014	272,47	11,49
agosto 2014	272,18	11,78
settembre 2014	272,28	11,68
ottobre 2014	272,07	11,89

Cardano al Campo, 14 luglio 2014
[Rif. n.296-R1]

Rilievo delle coordinate planimetriche dei punti : PZ1 - PZ2 - PZ3 - Asta idrometrica del laghetto di cava - Posizione pompe a ridosso del laghetto di cava - Pozzo cava - S8 - Asta idrometrica sul Rio Acquanegra - Asta idrometrica sul Lago di Monate.

Nei giorni 26 giugno, 1 e 11 luglio c.a. sono stati effettuati i rilievi topografici finalizzati alla determinazione delle coordinate planimetriche nei sistemi ETRF 2000 - RDN e ROMA40 GAUSS-BOAGA nonché le quote s.l.m. secondo il Geoide Italgeo 2005 dei punti sopra indicati. Durante le attività di rilievo si è anche operato al fine di rendere omogenee con i nuovi rilievi le quote assolute delle bocche dei piezometri già oggetto di livellazione nel mese di Aprile 2013 .

I rilievi sono stati eseguiti processando i seguenti punti :

1. La posizione e la quota ellissoidica dei punti PZ1, PZ3 e della sommità dell'asta idrometrica sul Lago di Monate sono state rilevate mediante rilievo GPS RTK con media temporale di 10 minuti utilizzando contemporaneamente le costellazioni GPS e GLONASS sfruttando le correzioni differenziali fornite dalla rete di stazioni permanenti Netgeo con inquadramento in ETRF 2000 (2008.0) - RDN certificato da IGM.
2. I punti PZ2, l'asta idrometrica sul Rio Acquanegra con la relativa sezione trasversale, l'asta idrometrica del laghetto di cava e la posizione delle pompe a ridosso del laghetto di cava a causa del mancato raggiungimento della condizione "fix" del ricevitore GPS sono stati rilevati utilizzando una "Stazione Totale" topografica orientata su tre punti le cui coordinate sono state in precedenza rilevate tramite la procedura descritta al punto 1.
3. Al fine di rendere omogenee le quote assolute dei piezometri posti a ridosso dello stabilimento si è deciso di rilevare e calcolare le quote di due piezometri già oggetto della livellazione effettuata in Aprile 2013 da utilizzare come base per il ricalcolo. Sono stati rilevati PZ6 e PZ4 e derivati PZ4,5,6,7,9,A,B,C,D e PZMO.
4. Per il punto S8 si è deciso di operare secondo il seguente metodo :
 - Posa di un caposaldo inquadrato tramite GPS statico di almeno 30 minuti per base con appoggio ai capisaldi della rete GPS di Regione Lombardia posti nelle immediate vicinanze del punto da materializzare
 - Con appoggio al caposaldo posato, rilievo statico prolungato della base con il punto S8

I punti di Regione Lombardia utilizzati sono codificati 031605 - 031609, le monografie sono allegate alla presente. Il caposaldo con le relative coordinate e la documentazione fotografica inserita nell'elaborato grafico vengono consegnate con la presente al Committente e potranno essere utilizzati come riferimento per ulteriori lavori topografici. Il rilievo statico per la determinazione del punto S8 si è prolungato per oltre 8 ore.

La parte altimetrica è stata risolta utilizzando il grigliato "031605.GK2" fornito in data 30/06/14 alla scrivente dall'Istituto Geografico Militare, riproiettando le quote dal sistema di origine (ETRF 2000 - RDN) al geoide ITALGEO 2005. Lo stesso grigliato è stato utilizzato anche come base per la trasformazione delle coordinate dal sistema di origine al sistema Roma40 Gauss-Boaga.

ALLEGATI :

- Elaborato grafico
- Monografie capisaldi Regione Lombardia

Geom. Colombo Paolo

 Regione Lombardia <i>Territorio e Urbanistica</i>	Localita' CADREZZATE (cimitero)	Nome 031605	Sezione C.T.R. A4b5	Altri Enti	
	COMUNE DI CADREZZATE				
	Collegamento altimetrico da C.S. Quota=		Q. ell.: H= 321,662	Q.s.l.m.: H= 274,178	
	Rilievo effettuato da A.T.P. S.r.l. - Perugia - febbraio/giugno 2003				

Accesso:

Da Sesto Calende percorrere la S.S. 629 in direzione Besozzo; all'indicazione del cartello deviare a sinistra per Osmate e seguire la S.P. 33 fino a Cadrezzate; da qui continuare sulla S.P. 36 in direzione Monate. Appena superato il cimitero, al Km. 2+900 circa, sulla destra c'è il punto.

Materializzazione:

Centrino infisso sul muro di sostegno e divisorio in calcestruzzo del parcheggio per cicli e motocicli ubicato nei pressi del cimitero di Cadrezzate, in via Mogno, al Km. 2+900 della S.P. 36 Ispra-Varese.

20021 Bollate – MI

Oggetto:
analisi di fitoplancton lacustre Lago di Monate

Nelle pagine seguenti si riportano i risultati qualitativi e quantitativi del campionamento effettuato in data 07/08/2014.

Nel dettaglio la tabella contiene i seguenti dati :

- Lista delle specie
- densità (ind. / ml)
- biomassa (mm^3 / m^3)

Cordiali saluti

Cesare Puzzi
